## EXPERIENCE

### *Team Lead*

*Capstone, George Brown College, Toronto, ON Canada*

*Sept. 2019 - March 2020*

- Delivered a full-stack (front-end UI, back-end server, database) web application that manages data and information within a business entity
- Implemented various technologies via Node Package Manager (such as QR code scanner, JWT web tokens, nodemailer etc) which improved the overall application by making business processes run smoother
- Developed the Front-end UI that will cater the needs of the “Instructor” User that has QR scanning capability and starting a class session.
- Managed a team of talented individuals and made sure everyone was able to deliver exceptional code within project deadlines

### *Crew Trainer*

*July 2016 – April 2018*

*McDonald’s Restaurant, Newmarket, ON Canada*

- Provided customer service in a busy, fast-paced environment and have worked under pressure
- Trained new crew on policies and procedures that increased safety and reduced waste products
- Provided leadership in times of emergency such as understaffed situations resulting in smooth flow of the shift.

### *Manager*

*July 2013 –Feb 2016*

*Otaku Pop: Hobby Shop, Cebu, Philippines*

- Managed a small-scaled start-up business that helped attain production and sales projections for the shop.
- Communicated effectively with online customers with their product specifications leading to satisfied patrons and sales
- Committed to customers/clients satisfaction resulting to having fully booked schedules of at the very least of 2 months ahead of time
